EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Oliff on September 1, 2006.

The application has been amended as follows:

Claims 12-23 cancelled.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art fail to teach or suggest a fluid pump driven by the energy of the air flowing through the air line to suck a fluid in the hydrogen line. Applicant teaches in specification page 15 lines 13-26, that the ejector pump sucks the fluid on the hydrogen electrodes of the fuel cell stack through the suction line 41 and that the sucked fluid then passes over the oxygen electrodes and is drained outside the fuel cell system through the air drain line 21, thereby removing the water on the oxygen and hydrogen electrodes of the fuel cell stack. Applicant teaches that the removal of water from the oxygen and hydrogen electrodes at the stop of the fuel cell system eliminates problems encountered in the cold environmental conditions such as a failure in operation of each valve and a blockage of the hydrogen or air line due to frozen water or freezing of the electrolyte

films of the cells of the fuel cell stack, thus, improving the startability of the fuel cell stack in the cold environments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
